

Toyota Motor Sales, USA, selected our Center to be part of their national Toyota Technician Training and Education Network (TTEN). This program is an intense technical training and academic program provided in partnership with Toyota Motor Sales, USA; Southeast Toyota; and local Toyota and Lexus dealers. Automotive background is recommended. Talented students currently or previously enrolled in automotive programs can look forward to this challenging and fulfilling training.

Training for a Career

The career opportunities for trained automotive technicians are numerous. Auto manufacturers and dealerships, independent repair centers, mass merchandisers and service stations are all competing for skilled technicians. Today's automobiles are high-tech, computer-controlled machines. The demand in the job market for highly trained personnel has become critical. The T-TEN program is designed to prepare students to become entry-level automotive technicians and to provide the academic background for advancement in the automotive service industry, specifically in Toyota and Lexus dealerships.

Salaries & Benefits

A recent study of jobs in South Florida, conducted by the Florida Department of Labor, shows that skilled auto technicians can earn more than mechanical engineering technicians. Many companies provide paid vacations, medical and dental plans, and management opportunities.

Toyota T-TEN Courses

This program includes classroom and hands-on instruction reinforced with high-tech computerized learning systems using specialized trainers, simulators, and live vehicles. Course content relates directly to the areas of ASE Certification and includes:

- Introduction to Automotive Technology
- Engine Repair
- Engine Performance
- Automatic Transmission/Transaxle
- Electrical Systems/Autotronics
- Heating & Air Conditioning
- Manual Drive Train & Axles
- Suspension and Steering
- Brake Systems
- Advanced Engine Performance
- Hybrid Maintenance

This program also includes on-the-job internship training experiences in real Toyota and Lexus Dealerships.

Completion Time

Classes are offered on a full-time basis only, which includes a paid internship. The standard length of this Program is 2400 hours, or two school years.

NATEF/ASE Certification

The National Automotive Technicians Education Foundation, a part of the National Institute of Automotive Service Excellence, has certified our Automotive Program as meeting their national standards for automotive education institutions. Practicing and future technicians should become

certified in all basic technical areas established by the ASE Testing Service. ASE tests are given during four testing periods annually and often are the basis for hiring and salary decisions by many companies. All students are encouraged to take at least the eight (8) basic ASE exams during their training. Students are required to attain at least two (2) ASE certifications prior to program completion.

A/C Certification

As part of the T-TEN Program, instruction is provided in the use of recycling equipment for mobile air conditioners. This unit provides instruction in the proper handling of refrigerant R-12/134A now used in mobile air conditioning systems, and the use of current recovery and recycling systems. The danger and damage done to the environment from improper venting of refrigerant is emphasized. Students will receive a certificate after completing the class and passing the required exam.

Applications / Admissions Policy

Most of the training programs at MLEC have certain requirements to enter the training and/or occupation. To participate in this program, you must have a high school diploma/GED, complete a Program Application, meet the program basic skills requirements on the TABE admissions assessment, and provide evidence of your current driving record. Since the dealer internship is an integral part of the program, you should be prepared to pass dealer employment requirements prior to an internship placement that may include, but are not limited to: drug testing; driver's license documentation; and obtaining a County Motor Vehicle Repair ID Card. Applicants must have the basic skills and aptitudes necessary for potential success in the training program, and the automotive service industry.

For More Information

Persons interested in the T-TEN Program should contact Phillip Wolansky, Master ASE Certification, Toyota Factory Trained or David Uncapher, Master ASE Certification, Toyota Factory Trained, at 305-828-1176.
